## ATTACHMENT TO ADVISORY ACTION

The after-final amendment filed December 2, 2004, has been received. The Rule 132 Declaration of Sasa Kranjc has been received and considered. The text of those sections of Title 35, U.S. Code, not included in this action can be found in a prior office action.

The after-final amendment filed December 2, 2004, will not be entered because it raises new issues for search and consideration. The proposed claim amendment requires the consumption of all phosphate in the fermentation medium prior to a second addition of phosphate and maintenance of phosphate concentration. This is a new limitation which has not been searched or considered previously with respect to prior art and with respect to support in the specification. Because the new claim language requires additional search and/or consideration, non-entry of the proposed amendment is clearly proper under 37 CFR § 1.116.

All of applicant's argument has been fully considered but is not persuasive of error. Applicant's argument almost entirely assumes entry of the non-entered after-final amendment. While applicant states that the previous office action was non-final (page 5 of response of 12/2/04), the previous office clearly was a final rejection. In view of the non-entry of the

Application/Control Number: 09/171,081

Art Unit: 1651

amendment, the majority of applicant's argument is not directed claim limitations currently pending.

With respect to the allegation of unexpected results resulting from the use sodium dihydrogen phosphate in the fermentation medium, it is noted that unexpected results are not relevant to an analysis of rejections under § 102, said rejections still being pending by virtue of the non-entry of the amendment filed December 2, 2004. Moreover, of the actual pending claims, only claims 45 and 46 recite the use of sodium dihydrogen phosphate, with claim 45 still reciting the use of the potassium phosphate salts used in the Cole reference. Thus, applicant's argument in this respect is relevant only to claims 45 and 46, to the extent those claims recite sodium dihydrogen phosphate.

As to the significantly increased yield obtained from using the sodium salt instead of the Cole's potassium salt, it is noted that this increase came from a specific set of fermentative conditions which still are not recited in the claims, nor do the claims require any specific yield. While it is also noted that the increase in clavulanic acid production using the sodium salt over the potassium salt is not specific to a particular microbial strain, as evidenced by the Declaration by Sasa Krajc and the accompanying materials, the yield increase

Application/Control Number: 09/171,081 Page 4

Art Unit: 1651

certainly is derived from a specific set of conditions not currently recited in the claims, particularly in view of the non-entry of the amendment of December 2, 2004. Moreover, to the extent the claims still encompass anticipatory prior art, any allegation of unexpected result is not relevant to the analysis of those claims.

No claims are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Francisco C. Prats whose telephone number is 571-272-0921. The examiner can normally be reached on Monday through Friday, with alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Wityshyn can be reached on 571-272-0926. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (tol/1)free).
